

IQ Balcony Solar Kit

This document contains important instructions to follow during the installation of the IQ Balcony Gateway and IQ Microinverters.

Safety and advisory symbols

	WARNING: Hot surface
	WARNING: Refer to safety instructions
	DANGER: Risk of electric shock
	Refer to the manual
	Double insulated

Safety and advisory symbols

	DANGER: Indicates a hazardous situation, which, if not avoided, will result in death or serious injury.
	WARNING: Indicates a situation where failure to follow instructions may be a safety hazard or cause equipment malfunction. Use extreme caution and follow instructions carefully.
	WARNING: Indicates a situation where failure to follow instructions may result in burn injury.
	NOTE: This indicates information particularly important for optimal system operation. Follow instructions carefully.

Safety instructions

	DANGER: Risk of electric shock. Do not use Enphase equipment in a manner not specified by the manufacturer. Doing so may cause death or injury to persons or damage to equipment.
	DANGER: Risk of electric shock. Be aware that installation of this equipment includes the risk of electric shock.
	DANGER: Risk of electric shock. The DC conductors of this photovoltaic system are ungrounded and may be energised.
	DANGER: Risk of electric shock. Always de-energise the AC branch circuit before servicing. NEVER disconnect any cables/connectors without toggling the system switch to the OFF position on the IQ Balcony Gateway.
	DANGER: Risk of electric shock. Risk of fire. Ensure that all AC and DC wiring is correct and that none of the AC or DC wires are pinched or damaged or are left unattended/open ended.
	DANGER: Risk of electric shock when IQ Microinverter's LED becomes solid red.
	DANGER: When the PV array is exposed to light, DC voltage is supplied to the IQ Microinverter. The LED on the IQ Microinverter flashes red when this happens for the first time.
	WARNING: Risk of equipment damage. Enphase male and female connectors must only be mated with the matching male/female connector as mentioned in the quick install guide/user manual.
	WARNING: Before installing or using the Enphase microinverters, read all instructions and cautionary markings in the technical description, on the Enphase Energy System, and on the photovoltaic (PV) equipment.
	WARNING: DO NOT connect Enphase IQ Microinverters and IQ Balcony Gateway to the house socket (power outlet) or energize the system until you have completed all of the installation procedures per the installation guide/user manual.
	NOTE: To ensure optimal reliability and to meet warranty requirements, install the Enphase IQ Microinverters, IQ Balcony Gateway, and IQ Cable according to the instructions in the quick installation guide.
	NOTE: Provide support for the IQ Cable at least every 30 cm, do not let it hang or lie on the floor. Use the cable ties.
	NOTE: The AC and DC connectors on the cable are rated as disconnect-only when used with an Enphase microinverter.
	NOTE: Protection against lightning and resulting voltage surge must be in accordance with local electrical codes and standards.
	NOTE: An RCD with a rated residual operating current not exceeding 30 mA must be installed upstream of the equipment.
	NOTE: The equipment must be connected to an earthing connection.

IQ Microinverter safety

	DANGER: Risk of electric shock. Risk of fire. Do not attempt to repair the Enphase microinverter; it contains no user-serviceable parts. If it fails, contact Enphase Support to obtain an RMA (return merchandise authorization) number and start the replacement process. Tampering with or opening the Enphase microinverter will void the warranty.
	WARNING: Risk of equipment damage. Install the microinverter under the PV module to avoid direct exposure to rain, UV, and other harmful weather events. Always install the microinverter bracket side up. Do not mount the microinverter upside down. Do not expose the AC or DC connectors (at the IQ Cable connection, PV module, or the microinverter) to rain or condensation before mating the connectors.
	WARNING: Risk of equipment damage. The Enphase microinverter is not protected from damage due to moisture trapped in cabling systems. Never mate microinverters to cables that have been left disconnected and exposed to wet conditions. This voids the Enphase Warranty.
	WARNING: Risk of skin burn. The chassis of the Enphase microinverter is the heat sink. Under normal operating conditions, the temperature could be 20°C above ambient, but under extreme conditions, the microinverter can reach a temperature of 90°C. To reduce the risk of burns, use caution when working with microinverters.

IQ Cable safety

	DANGER: Risk of electric shock. DO NOT leave AC connectors on the IQ Cable uncovered for an extended period. You must cover any unused connector with a sealant cap.
	NOTE: If you need to remove a sealant cap, you must use the IQ Disconnect Tool (present at the backside of IQ Balcony Gateway). DO NOT connect/disconnect the sealing cap while the system is powered.

IQ Balcony Gateway safety

	DANGER: Risk of Electric Shock. Risk of Fire. Do not attempt to repair the IQ Balcony Gateway. Tampering with the IQ Balcony Gateway will void the warranty. If the IQ Balcony Gateway fails, contact Enphase Support for assistance.
	DANGER: DO NOT connect the Aux socket to any wall outlet at home. This must be connected only to a load.
	WARNING: This product is intended for operation in an environment having a maximum ambient temperature of 50°C.
	WARNING: Before disconnecting any cables from IQ Balcony Gateway / IQ Microinverter, ensure to de-energize the system by toggling the system switch to the off position (present next to the auxiliary socket under the hatch).
	WARNING: DO NOT connect loads that draw more than 12 A of continuous current. Although safety mechanisms are built-in, it is not recommended.
	WARNING: The system on/off switch is not to be confused with the power on/off switch for the load connected.

Note for third-party products

Any third-party manufacturer or importer product(s) used to install or commission Enphase product(s) shall comply with the applicable EU Directive(s) and requirements in the European Economic Area (EEA). It is the responsibility of the installer to confirm that all such products are labeled correctly and have the required compliant supporting documentation.

Manufacturer

Enphase Energy Inc., 47281 Bayside Pkwy., Fremont, CA, 94538, United States of America, Ph: +1 (707) 763-4784

Importer

Enphase Energy NL B.V., Het Zuiderkruis 65, 5215MV, 's-Hertogenbosch, The Netherlands, Ph: +31 73 3035859
